

# Next Generation Recording Software

With Integrated eRecording!

The Louisiana Clerks Remote Access Authority is pleased to make available a state-of-the-art custom Recording Software application for Clerks to streamline recording documents within their offices and for use by registered users to record electronic documents through secure remote internet access via links on the [eClerks LA Portal](#).

LCRAA's goal was to have software *designed by Louisiana Clerks for Louisiana Clerks* to streamline the time necessary to process records and implement standard operating procedures for recording and preservation of recorded documents among participating parishes.

## *Records Management that Empowers your Office*

- Information at your fingertips for [Land](#) and [Marriage](#)
- Intelligent workflow and processing queues
- Your data is protected, encrypted and secure in the Google Cloud
- Integrated eRecording through LCRAA's Public Online eClerks LA Portal
- Built-in Safeguards for data entry, fee calculations and approval processes

## *Featured Software Modules and Functionality*

Recording Intake

Smart Reporting

eRecording / Portal Imports

Cashiering

Search

Security

Marriage License

Document types

Utilities

Document Scanning

Fee Schedules

What Louisiana Clerks  
are Saying:

The LCRAA Recording Software by Antares is not only easy to use, but it looks great! The design of the software is very easy on the eyes! The entire team at Antares is very responsive with answering questions and fixing issues as soon as they come up. Every time we've contacted Antares, we received some type of immediate feedback. They have excellent customer service as well as an excellent product.

-Wess Robison, Chief Deputy, Iberia Parish

## Ready to Get Started?

### Here's How Onboarding + Data Migration Works!

Our goal is to provide each parish with a straight forward roadmap to follow insuring a successful implementation of LCRAA's new Recording Software.

Getting started with LCRAA Recording Software is an easy 3-Step Process:

#### 1. We Set-up Your Environment

We create your test site to reflect your future production site. This includes configuring your parish specific information and crest; specific settings for security; list of users and their roles and permissions; review of document types, parish fees and GL codes.

#### 2. We Migrate Your Data

Your parish provides a copy of your data from your current system. We map, refine and import your data – indices, documents and images - into your LCRAA Recording Software. We go through a rigorous process to insure your new system is fully ready to support you and your customers who access your data online.

#### 3. We Train You and Your Staff

Built-in business process workflows make it easy and intuitive to train your staff from start to finish of the Recording process, eRecording, Marriage and Reporting. We provide User Guides and system shortcut flash cards or mouse pads.

What Louisiana Clerks  
are Saying:

The transition to the new LCRAA Recording Software was flawless. My staff really likes the software and have found it's faster and easier to get their work done.

-Susan Racca, Clerk, Cameron Parish

## Software Licensing and Support

- Never a License fee - LCRAA owned software!
- Onboarding, Data Migration and Training paid for by LCRAA
- Monthly maintenance and support cost based on volume – only pay for what you process
